PROFESSIONAL SUMMARY

Data Analytics-focused Computer Science Engineering student seeking a Data Analytics Internship / Fresher Data Analyst role. Experienced in data cleaning, exploratory data analysis (EDA), KPI and business performance analysis, and building interactive dashboards using Python, SQL, Excel, and Power BI. Proven ability to turn raw, messy datasets into clear, actionable business insights through hands-on projects and a completed Data Analytics internship at CodeAlpha. Comfortable working across the full analytics workflow — data collection, cleaning, analysis, visualization, and insight reporting — to support data-driven decision making.

TECHNICAL SKILLS

Data Analytics: Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, KPI & Business Performance Analysis, Data Modeling

BI & Spreadsheet Tools: Microsoft Power BI (Interactive Dashboards), Microsoft Excel

Programming & Libraries: Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Streamlit

Database: SQL — SELECT, WHERE, JOINS, GROUP BY, Subqueries

Version Control: GitHub

INTERNSHIP EXPERIENCE

Data Analytics Intern — CodeAlpha (Virtual Internship)

Aug 2026

- Completed all assigned data analytics tasks in a virtual internship, applying end-to-end analysis workflows from raw data to actionable insights.
- Applied Python for data cleaning, exploratory data analysis, and visualization on real-world style business datasets.
- Delivered projects spanning EDA, data visualization, sentiment analysis, web scraping, and business/e-commerce data analysis using Python, Pandas, NumPy, Matplotlib, Seaborn, and Plotly.

PROJECTS

Business Performance 360° Dashboard | Power BI, Excel, SQL, Python, Pandas, NumPy

- Cleaned, validated, and modeled business data using Python and SQL to build a reliable, repeatable analysis pipeline.
- Analyzed key business KPIs and built an interactive Power BI dashboard to track performance trends across the business.
- Extracted actionable insights and delivered data-driven recommendations to support business decision making.

GitHub: github.com/komal362783/Business-Performance-360-Dashboard

Customer Voice Sentiment Analysis | Python, Pandas, NLTK, VADER, NLP, Streamlit

- Cleaned and preprocessed customer review text data, then applied NLP and sentiment analysis techniques to gauge customer perception.
- Performed sentiment and emotion analysis on review data using NLTK and VADER to uncover customer-experience patterns.
- Built visualizations and an interactive Streamlit dashboard to present customer insights for data-driven decisions.

GitHub: github.com/komal362783/CodeAlpha_CustomerVoiceSentimentAnalysis

E-Commerce Sales Data Visualization | Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Streamlit

- Cleaned and preprocessed e-commerce sales data across products, customers, and regions for analysis.
- Performed exploratory data analysis to identify sales trends and built interactive visualizations to communicate business insights.
- Generated data-driven recommendations to support sales strategy and business decision making.

GitHub: github.com/komal362783/CodeAlpha_EcommerceSalesDataVisualization

Superstore Sales & Profit Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed exploratory data analysis on sales and profit data to uncover key business patterns.
- Analyzed performance trends across customer segments, regions, and time periods to support KPI tracking.
- Created visualizations to highlight trends and support data-driven business insights.

EDUCATION

B.Tech — Computer Science Engineering — Faculty of Engineering & Technology, Agra College, Agra

2023 – 2027 (Expected)

Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow

CERTIFICATIONS

- TATA — GenAI Powered Data Analytics Job Simulation, Forage (July 2026)
- Machine Learning with Python — IBM Cognitive Class
- Oracle Certified Foundations Associate — Oracle

SOFT SKILLS

Communication • Teamwork • Problem-Solving • Analytical Thinking • Attention to Detail • Time Management
